

## VISCO 4.8 Release Notes

- For users of browsers other than Microsoft Internet Explorer, any tools you have available under VISCO's Tools: Data Update Tools that have "Excel Import" enabled will now function using the same "drag and drop" method as the standard document upload tool in VISCO. Just click the "Download Date in Excel" button per the image below, save the file you are editing on your local machine then Drag and Drop that file (or browse and select that file using the "select" button) and the data from that file will be uploaded accordingly into the data grid used for import.
