

# VISCO 5.0.22.3.2 Release Notes

- 1) **VISCO Scan Improvements:** We've heard you and we are speeding things up! We've uncovered opportunities to speed up filters. We've also made it easier to "stack" filters with an And/Or dropdown selection that gives the user more options on how to narrow down their search.

The screenshot shows the VISCO software interface with a search filter stack at the top. The filter stack contains two filters: "Product Id Contains: ut" and "Or Product Id Contains: ab". Below the filter stack is a dropdown menu with "Or" selected. The main table displays search results with columns: Product Id, CAS ID, Name, Synonyms, Active?, Type, Category, Default Sale Price, Default Purchase Price, Available Quantity, and Carton Dimension Weight per Carton. The table contains six rows of data.

	Product Id	CAS ID	Name	Synonyms	Active?	Type	Category	Default Sale Price	Default Purchase Price	Available Quantity	Carton Dimension Weight per Carton
I want to	68-UT-BRA34		68-UT-BRA34 N		Yes			0.00000	0.00000	0.00000	
I want to	68-UT-BRA34C		a//s/d/vf\ products		Yes	PHARMA		55.00000	45.00000	700.00000	
I want to	68-UT-BRA34Csdsdv		Sixty Eight Urban Tribe 34C Bra		No	1 of Product Group 1		12.00000	8.75000	0.00000	
I want to	ABAH		erintestcopy1	erintestcopy1	No	1 of Product Group 1	TEST 2	500.00000	400.00000	0.00000	
I want to	ABC 123 10092014		a//s/d/vf\ products		Yes	PHARMA		55.00000	45.00000	0.00000	
I want to	abc#5%		ABC#5%	abc*&^	Yes	FOOD		2345.00000	1345.00000	0.00000	

- 2) **VISCO Text Messaging:** VISCO can send you texts now. Do you want to be notified right when a Sales Order is created? What about when your Container ETA changes? How about when inventory drops to dangerous levels? Send your idea [support@viscosoftware.com](mailto:support@viscosoftware.com) and we'll let you know how much work is involved (Hint: Not as much as you think!)
- 3) **VISCO EDI Integrations:** Have you considered automating your inbound and outbound EDI transactions? Now might be the time as we at VISCO are currently BETA testing a proprietary EDI interfacing system to compete with some of the third-party EDI translation options that many of our customers currently leverage as part of their data management infrastructure. Check in with [support@viscosoftware.com](mailto:support@viscosoftware.com) for more details.

- 4) **QuickBooks Integration Improvements:** With each new release we look to improve our integration and this release is no different.
- a When creating Cost Types in VISCO, QuickBooks Online users will have a pre-filtered Chart of Accounts directly from their QuickBooks install to connect each cost type too. Same thing for new VISCO Misc. Charges.
  - b We are offering integrations with VISCO and QuickBooks Product data (after some discussions about the impact of this change on Inventory and Cost of Goods Sold valuations).
  - c We have dynamic access to ALL available QuickBooks online integration functions without additional core code changes as well, so whatever your mind can dream up, we can do without waiting for the next release.
- 5) Various user interface improvements and bug fixes have been included since the last release as well
- a Venture Analysis Upgrade (P57916)
  - b Release Analysis Upgrade (P85355)
  - c Multi Copy Buttons for Purchase Order, Sales Order and Quote: Ask VISCO Support for more details (P80581)
  - d Automatic Container Tracking Improvements (P86654)
  - e Additional optimizations, particularly in Allocation load, and bug fixes
