

VISCO 5.0.21.9 Release Notes

1) Plus (+) Button has been added to all Scans

We have added a + button next to the Search and Excel export buttons on each Scan in VISCO. It functions exactly the way the + button does in our left navigation, adding a new entity and bringing the user directly into that entity's edit page.

2) Mouseovers (Hovers) available in Scans

Users of our previous interface will remember that we had the option to mouse over certain columns in certain scans to see more details. In the upgrade though, we have added that functionality to the 5.0 interface and made it more dynamic so that any available column can appear as the mouseover to any visible column in any scan. Want to see the Bill of Lading date when you hover over the Bill of Lading Number in the Container Scan? Just let us know and we can show you how or keep an eye out for our [upcoming YouTube instruction video on Scan Edits](#). In the meantime, see below for an example.
